

FLEXI

FLEXI is our extremely versatile frame sign system with flat finish. The system's flexible construction enables production of custom signs in any format, for multiple applications. The grooved side profiles support a selection of replaceable inserts. And due to the system's frame structure design, FLEXI creates very lightweight signs – a significant benefit for suspended signs.

FLEXI is an all-through versatile sign system and a great choice for wall mounted and suspended signs, flag signs, and indoor pylon signs.

MAIN FEATURES. Lightweight, completely customizable flat frame sign system. Sign information as replaceable plastic, paper and aluminium inserts. Suitable for interior and exterior signage.

OTHER FEATURES. Assorted accessories for ceiling suspension, wall mounting and flag sign construction.

FULLY CUSTOMIZABLE DESIGN.

The FLEXI system's frame construction creates extremely lightweight and fully customizable signs.
