

TOTEM

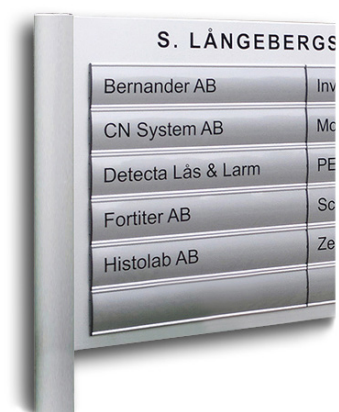

Our sign system TOTEM is designed for production of larger freestanding signs, for both indoor and outdoor signage. The grooved side profiles support full-sign-size aluminium sheets or custom size panel rows. TOTEM signs can be built as elevated signs on two leg, or full length pylon signs with supporting base plate or ground casted. The system includes side profiles in two sizes, 95 mm and 56 mm in depth, for construction of curved or flat signs in custom heights up to 6 metre.

When more frequent information update is required a flat TOTEM construction can be integrated with our sign systems SLIM and CONVEXA, to produce freestanding signs with flat or curved sign rows supporting replaceable plastic inserts.

TOTEM is a sustainable choice for wayfinding, directory and information signs in public places, office spaces, workplaces or any bigger indoor or outdoor locations.

MAIN FEATURES. Curved or flat freestanding signs. Durable and steady design. Suitable for indoor and outdoor signage.

OTHER FEATURES. Flat TOTEM-constructions can be integrated with our sign systems SLIM and CONVEXA.

TOTEM WITH REPLACEABLE INSERTS.

By complementing a flat TOTEM sign with sign rows from our systems CONVEXA or SLIM the finished sign will get our replaceable insert feature, and plastic inserts can easily be updated or replaced.
